High Resolution 2.5x, 3.0x, 3.5x
Q-Optics High Resolution Loupes feature an extra dense optical system. Multiple lenses and glass types combine to create increased image clarity. Weight was not ignored however as these loupes still weigh an average 25 grams less than standard optical systems.

Prismatic (Expanded Field) 3.5x, 4.0x, 4.5x
Q-Optics Prismatic loupes feature a greatly expanded field of view and edge-to-edge clarity. Machined titanium unibody housing and carbon fiber shrouds provide extreme weight reduction without compromising optical performance. Nose-relief design, combined with the TrueFit measurement system, achieves the steepest ergonomic angles.

True-Fit® Technology, a Q-Optics exclusive, helps ensure that your custom TTL Loupes are the perfect fit for you. The human face is one of the most subtly complex parts of the human body and the fit of your loupes should be more than determining the width of your eyes. Q-Optics True-Fit® Technology digitally captures all your necessary facial features and frame fit characteristics. Custom measurement, custom fitting, and custom fabrication are what set us apart.

Capture  Analyze  Build
Q-Optics Custom Through-the-Lens style loupes features:

- Pure Titanium Frame
- Soft silicone nosepads
- True-Fit™ Digital Loupe Fit Technology
- Anti-Fog Lenses
- Broad band AR and scratch resistant coating
- Light Weight
- Waterproof telescopes
- Lifetime Guarantee on Titanium frames, optical seal, bond of telescope to the frame, and cracking of the frame lens
- True ergonomic customization—no standard angles, widths, loupe heights, or working distances
## Specifications

### Through the Lens (TTL) Style Loupes
